**QQA Seal of Recognitions**

# “Practical Applications of FIDIC Contracts”

## Introduction:

This course informs the engineer his rights when he is preparing or signing a construction or a design contract. Moreover, this course focuses on the problems that might occur during the execution of a construction or a design contract and the legal directions to manage the obstacles.

This course outlines the various elements of the FIDIC 1999 suite of contracts.

## Objectives:

At the end of the course, the participants should be able to:

- Be aware of the various forms of FIDIC Contracts and the philosophy of choosing the suitable form.
- Appreciate the roles of key parties in a construction contract.
- Understand the important clauses of the FIDIC Contracts.

## Course Methodology:

Customized training manual and classroom lecture presentation with exercises.

The course will be given by using several examples on construction and design contracts, and using the current forms of contracts (FIDIC) during the course.

Some practical examples for FIDIC contracts will be presented and discussed.

## Who Should Attend:

- Project Managers
- Project Control Manager
- Senior Project Control Engineers
- Senior Planning and Scheduling Engineers
- Contract Administrators and others who are interested or involved in Contract Administrations, Claim preparation and/or claim analysis.

This is an essential course for those who work in contracts and Project Management.

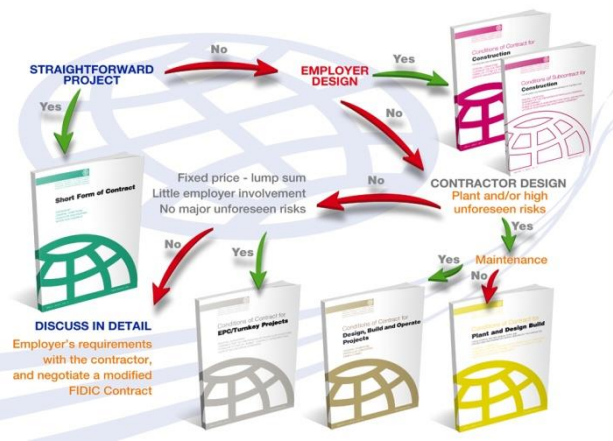

# Course Outline:

## Course Trainer:

### Dr. Ayman Nassar

Dr. Ayman is holding a degree in Ph.D. in Structural Engineering, specialization area: Construction and Project Management during July 2000 and M.Sc. in Structural Engineering on June 1995 at Cairo University, Cairo, Egypt.

At present, he is an Assistant Professor at GUC (German University in Cairo), and Part Time Assistant Professor at AUC (American University in Cairo).

Dr. Ayman is holding a degree in Ph.D. in Structural Engineering, specialization area: Construction and Project Management during July 2000 and M.Sc. in Structural Engineering on June 1995 at Cairo University, Cairo, Egypt

At present, he is an Assistant Professor at GUC (German University in Cairo), Part Time Assistant Professor at AUC (American University in Cairo), and Part Time Assistant Professor at ASU (Ain Shams University in Cairo). He is a supervisor for more than ten Masters and Ph.D. Degrees for Construction and project management.

## Assessment:

All assessments will be conducted during the workshop. Assessment tasks consist of e.g: quizzes, practical discussions, case studies, role plays, on-site exercises, hands-on.

## Certificates:

Certificates will be awarded to the learners who pass in the assessments and completed at least 75% of the attendance report.

## Course Language:

English

## Progress Reports:

Progress and attendance reports linked to the specifications for the reporting period will be sent to the company for each learner. This report will list learner's progress and achievements with respect to the appropriate section of the syllabus, indicating the progress made towards the training objective.
