Email: bsetraining@batelco.com.bh

Website: www.mohandis.org

Introduction

This one day comprehensive training course on “Environmental Legislations and Compliance in Bahrain” is planned to create awareness on the existing environmental legislations, standards, guidelines and regulations that are planned, implemented and enforced in the country. The course is based on management and monitoring of various types of pollution and polluting sources with the aim of safeguarding occupational and public health as well as to conserve the environmental resources.

This course will encompass all important environmental legislations affecting air, water and land resources which are being enforced by the Supreme Council for Environment (SCE) in Bahrain. Compliance and adherence to these environmental legislations is required for all developments, industries, commercial organizations, small and medium enterprises and governmental institutions. New industries and/or any expansion are not permitted in Bahrain unless an environmental approval and clearance is obtained from SCE by submitting Environmental Impact Assessment (EIA) and other required reports. All operating industries and organizations are required to prepare and submit periodic Environmental Compliance Reports on emissions, effluent, solid waste and chemicals to the SCE in Bahrain.

Objectives & Benefits

The workshop aims to provide knowledge on existing environmental legislations in the Kingdom of Bahrain. The course will also highlight the requirement of environmental compliance reporting.

The workshop will cover the main duties of the national environmental organization as well as environmental legislations on water and air quality. Occupational noise standards and mitigation measures to control the noise levels will be introduced to the participants. Current domestic and industrial waste management being implemented in the country will be highlighted. Participants will learn the legal application and procedure of Environmental Impact Assessment (EIA) in Bahrain. Management of chemicals regarding how to store, handle and transport will be covered. The list of banned and restricted chemicals in Bahrain will be introduced to the participants. Work place requirements by law regarding ventilation, heat stress, lighting, noise and some other aspects will be discussed during course.

Course Outline

- Existing environmental legislation enforced in Bahrain,
- Duties and Tasks of the Environmental Authority in Bahrain
- The Environmental Impact Assessment Process in Bahrain,
- Standards for various environmental parameters,
- Legislation on Noise and Air Emissions,
- Industrial and domestic effluent management,
- Management of Municipal and Industrial waste in Bahrain,
- Management of Chemicals,
- Work place requirements,
- Requirement of Environmental Compliance Reporting.

Methodology

A combination of the following methods will be used during the workshop:
